Protect your Data against RANSOMWARE

**R & I ICT Consulting Services Pty
Ltd**

Provider of Security and Outsourcing Solutions for Small
and Medium Business and Not for Profit Organisations in
Canberra.

**Internet Based.
Cloud Backup System
Set and Forget!**

We all agree backup is critical to our business. Preparation is the best defence against hardware failure, software failure or a malware attack.

Now there is a better way to backup!

As a Business, you value your data enormously.

Just like any commercial organisation, you have documents, financial information, email and operational records to protect.

What makes you different from a larger business is the extra pressure on expenses and the need to convert every penny earned into productivity or profits.

You are similar though, to a large commercial enterprise in your need to maximise your income and operational efficiency. You cannot afford

to be disrupted by system downtime nor lose income as a result of lost data.

Data Protection against

CryptoVirus

100% Secure

If you don't back up your critical business information, a disaster could strike at any time, causing you to lose all or most of it. Ignoring that possibility, or forever putting off action, is not the responsible way to run a business. Once you have lost your critical information...it's too late to back it up!

All plans:

- ⇒ Fully Managed including checks of backups and restores
- ⇒ 30 Day free Trial, - just sign up.
- ⇒ Initial Backups can be uploaded via Portable Hard Drive at additional cost
- ⇒ Daily emails with understandable reports,
- ⇒ Unlimited Backups and restores
- ⇒ Log Monitoring for errors and failed backups
- ⇒ Automated Scheduled Backups
- ⇒ Securely Encrypted is storage and in transit — the only people who can access the data is **you**
- ⇒ Unlimited email and phone support
- ⇒ Database and Exchange backups included
- ⇒ Microsoft, Linux and Apple platforms are supported

Your off site backup is **priced for the small business and non-profit organisation** marketplace.

Your monthly investment is commonly between \$39 and \$199 per month and depends on the volume you use and the services to which you subscribe.

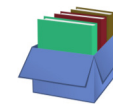

Micro - \$39 PM / \$390 PA

50Gb Compressed Data (Approximately 100GB)

SmallBiz - \$59 PM / \$590 PA

100Gb Compressed Space (Approximately 200GB)

Corporate - \$89 PM / \$890 PA

160Gb Compressed Data (Approximately 320GB)

Executive - \$129 PA / \$1290 PA

320 GB Compressed Data (Approximately 640 GB)

Super - \$179 PM / \$1790 PA

500GB Compresses Data (Approximately 1,000GB)

Enterprise - Starts at \$200 PM / \$2000 PA

>1,000Gb Compressed Data

Workstation Image — Add \$20PM / \$200 PA

Creates a virtualised image of the computer that you want to backup.

Server Image — Add \$60 PM / \$600 PA

Creates a virtualised image of the server that you want to backup.
